

# Chocolate Vision *L* and *A*ce

Tricia Allen, Williston, FL

## The basics of cutting and applying PhotoFrost icing sheets!

I've been working with my eBossler and PhotoFrost chocolate icing sheets. It was easy to do complex designs to decorate cakes with the Colored Icing Sheets without the use of a computer. They come in 8.5" x 11" sheets on a special backing paper so that you can print photos on them if you want. I used them to die cut right in my eBossler!! This is way cool!

It was super easy to set up my Craftwell eBossler because it's just plug in and create! I did wash in warm soapy water all my cutting plates and Cheery Lynn dies that I was going to use for the cake decorating and then dried everything.

I cut the PhotoFrost Chocolate Icing Sheets with scissors into the sizes I wanted for die cutting. I placed the die (cutting side up) cut wax paper (for easy release from the die), the PhotoFrost Icing Sheet, another sheet of wax paper. I used the waxed paper layers just so the icing sheet would not stick or pick up any imprints from my cutting plates. The eBossler cutting plate combination, from the bottom up, is C, D wax paper, die with cutting edge up, wax paper, PhotoFrost Icing Sheet, wax paper, A, E and B plates. Use a toothpick if necessary to remove the icing die cut.

I kept some of the more interesting cut outs to enhance the separating tiers of the cake.

I placed some edible glue on the back of the die cut icing sheet and placed the die cut icing sheet on the cake, trimmed the edges with scissors and matched the ends until the cake was completely wrapped.

For the separating tiers I repeated the process using the Vision horse head die and some of the cut outs from the Mediterranean lace die.

#### Products Used:

- PhotoFrost Colored Icing Sheets (Chocolate)
- eBoss by Craftwell
- Cherry Lynn Mediterranean Lace Rectangle
- Cherry Lynn Vision
- Cherry Lynn Free Spirit
- Wax paper
- Fondant covered cakes

#### Tools Used:

- PhotoFrost Chocolate Icing sheets
- Eboss (or other die cutting machine)
- Dies
- Edible glue
- Scissors
- Brush
